

Environmental Policy

The senior management of Denmaur Independent Papers Ltd (Denmaur) is committed to responsible environmental management.

We acknowledge our obligations to address the environmental impacts associated with our business activities and to comply with the statutory and regulatory requirements relevant to our business sector.

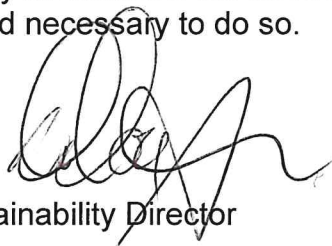

A structured and integrated Environmental Management System (EMS) has been implemented to address our significant environmental aspects, identified as: paper procurement, office and warehouse functions and company transportation.

Our EMS is certified to ISO 14001 and has set objectives, targets and programmes that are reviewed annually, as well as documented records and procedures for monitoring and measuring our performance in reducing and minimising pollution to air, land and water. Subject to continual improvement, our EMS also includes compliance evaluation, staff training, internal and external auditing and stakeholder communication.

We record our operational carbon footprint each year as part of our performance review, and since 2016 we have committed to a programme of offsetting our residual carbon emissions via the World Land Trust's Carbon Balanced scheme.

This policy is publicly available. It will be reviewed annually and then revised as and when it is considered necessary to do so.

Danny Doogan
Marketing and Sustainability Director

A handwritten signature in black ink, appearing to read 'Danny Doogan'.
